

MANUEL J. BARBOSA DE OLIVEIRA

I'm a freelancer behavioral scientist with scientific training in advanced statistics, programming, and Psychology.

I earned my Ph.D. degree after spending almost 5 years conducting research at the William James Center for Research and Utrecht University. This work resulted in the publication of multiple articles on high impact scientific journals, which offered important contributions to the fields of face and personality perception. Over the past years, I became passionate about programming and data analysis. I'm continuously seeking to learn and develop myself both professionally and personally. My ambition is to collaborate and bring value to the development of new applications and data products that optimize services, workflows, or make people's lives easier in general.
